The photo in which Mr. Pack appears was made during a workshop of vo-ag teachers at Brookville last July. Vocational Agriculture Instructors, other educational agencies, manufacturers, and power suppliers are cooperating in a porgram o increase the number of farm water systems.

Roughly 97% of Virginia farms now have a central station electric service. However, less than 50% have water under pressure. In Appomattox County only 72% of the farm homes have running water under pressure.

Must Dispose Excess Wheat

Farmers who have 1955 wheat acreage in excess of the farm allotment or 15 acres, whichever is the larger, may utilize the excess acreage as green manure, cover crop, hay or silage to avoid having a farm marketing excess of wheat. Farmers with 15 acres or less may also utilize acreage in excess of their allotments to qualify for price support.

In Appomattox County the date by which excess wheat shall be utilized is June 1, 1955, according to C. S. Rush, county ASC Chairman. He stated that acreage in excess of the allotment and 15 acres not utilized for one of the foregoing purposes by this date will be subject to a penalty of $1.13 per bushel.

The ASC chairman cautioned all wheat farmers in the county who have excess wheat, whether intentionally seeded or otherwise, to make a memorandum of the June 1 date of utilization. There are no provisions under the 1955 wheat marketing program for granting an extension of that date.

Farmers who plant wheat and other grain for mixture are also reminded that such mixtures must be less than 50 per cent by weight of wheat when seeded, as well as when harvested, to qualify as a wheat mixture under the definition of the marketing quota program. The responsibility of a wheat mixture turning out to be less than 50 per cent of wheat by weight when harvested is entirely upon the wheat farmer.

Any acreages which do not qualify under the definition of a wheat mixture and which acreages are in excess of the farm allotments will be subject to marketing quota penalties on the production therefrom.

Uncertainty continues as to the supply and next date for anti-polio inoculation.
